ABOUT ME

Self-taught full-stack web developer with 8 years of experience. Skilled in front-end and back-end technologies, driven to deliver high-quality results. Committed to continuous growth and advancement in the field.

WORK EXPERIENCE

Front End Developer

Ikon Soft S.R.L. [03/2022 – 08/2022]

Country: Romania

At Ikon Soft, I was a part of the team responsible for developing a SaaS solution for medical laboratories to efficiently manage their operations. I contributed to the design and implementation of various features, ensuring the delivery of a high-quality and user-friendly product.

Full Stack Web Developer

RustCasino.com [2022 – Current]

Website: <https://rustcasino.com>

Developed and managed RustCasino.com, one of the most advanced Rust gambling websites with features including crate opening with a customizable crate creator, crate battles, jackpot, coinflip, roulette, and more. Led the project as a sole developer, ensuring successful execution and delivery of the website.

Full Stack Web Developer

GTA5RPG.RO - Romanian GTA V RPG Server [2019 – Current]

Website: <https://gta5rpg.ro>

As a solo developer, I created and maintain the most complex GTA 5 RPG server in Romania, showcasing my ability to design and implement innovative features such as a marketplace where players can trade in-game assets for in-game currency or real money. The development of this project spanned over 2 years, demonstrating my dedication and longevity in delivering a successful and constantly running server.

Full Stack Web Developer

UnboxSkins.com - CS:GO Case Opening Website [2018 – 2021]

Website: <https://unboxskins.com>

I developed and launched UnboxSkins.com, an advanced CS:GO case opening website featuring a case creator tool. This project showcases my expertise in creating comprehensive and user-friendly websites with custom features. The case creator tool allowed users to design and create their own custom cases, offering a unique and personalized experience.

Full Stack Web Developer

laPermisul.ro - Get your driving license [2017 – Current]

Website: <https://iapermisul.ro>

I developed a website that aimed to assist individuals in Romania with obtaining their driving license. The website featured a subscription plan at its inception but due to lack of success and promotion, it was later hosted on a dedicated server and made available to users for free. The website replicated the exact questions from the real

theoretical driving test in Romania and provided an option to go through all questions randomly, facilitating faster learning. This project showcased my ability to develop a user-friendly and functional website that addresses a specific need in the market.

Full Stack Web Developer

FortniteSkill.com - See your Fortnite stats and rank [2018 – 2021]

In a previous venture, I developed FortniteSkill.com, a website that provided users with a ranking based on their Fortnite stats obtained from a private API. The private API underwent multiple changes, requiring constant maintenance of the website. After considering the resources required to keep the website functioning, I decided to shut it down. This experience has given me a deeper understanding of the challenges in using private APIs in web development projects.

Full Stack Web Developer

SteamPrices.net - Steam Prices API [2016 – 2020]

I developed and managed SteamPrices.net, a comprehensive API solution for developers in need of reliable and stable prices for virtual items on Steam. I was responsible for the design, development, and maintenance of the API, ensuring its stability and performance. SteamPrices.net was well received in the developer community and provided valuable insights into the virtual item market on Steam. However, due to changing market conditions and a decrease in demand, I was forced to close the API and move on to other projects. This experience has provided me with a solid understanding of API development and the skills necessary for delivering high-quality and reliable solutions.

Full Stack Web Developer

PUBGBets.net, CSGODose.com, RustBetting.com, H1Z1Chance.com [2015 – 2019]

From 2015 to 2019, I held the position of the main and sole developer for multiple online gaming websites, namely PUBGBets.net, CSGODose.com, RustBetting.com, and H1Z1Chance.com. These websites provided a platform for users to engage in virtual item gambling using popular games such as PUBG, CSGO, Rust, and H1Z1. My responsibilities included the full-stack development and maintenance of these websites, ensuring smooth and seamless operation for users. My efforts resulted in a successful and profitable venture, until I made the decision to sell these websites in 2019. This experience has provided me with a solid understanding of the gaming industry and the technical skills necessary for developing and maintaining large-scale websites.

Full Stack Web Developer

Personal projects [2015 – Current]

Since 2015, I have been actively engaged in personal full-stack development projects, honing my skills in multiple technology stacks and delivering robust and scalable solutions. My passion for technology and coding started even earlier, during 2010-2011, where I pursued smaller personal projects that involved minimal to no coding, allowing me to familiarize myself with different technology tools and systems. This combination of hands-on experience and technical knowledge has allowed me to excel in my current role as a full-stack developer and continuously develop my skills.

EDUCATION AND TRAINING

Bacalaureat

Liceul Economic Mangalia [2014 – 2018]
